RE: Final Report: Naval Environmental Leadership Program, Technology Evaluation Report  
for Solid Waste Management Unit 15, Naval Station Mayport; Mayport, FL

Dear Ms. Wilson:

I have reviewed the above referenced document dated January 1998 (received January 30, 1998). This report evaluates results from the demonstration of bioaugmentation of pesticides in soil at SWMU 15 by FIFCO Incorporated. The report concluded that the site was not the most appropriate for this type of remedial technology and that selected pesticides remained in the soil following the demonstration. I concur with these conclusions and, based on the demonstration nature of the project, the document is acceptable. Approval of this document does not relieve the Navy of the responsibility to properly address the named contamination.

Thank you for the opportunity to review this document. If you need further clarification or any additional information, please feel free to contact me at 850-921-4230.

Sincerely,

James H. Cason, P.G.  
Remedial Project Manager
